## RS2 SOFTWARE HOLDS SUCCESSFUL WORKSHOP

**RS2 Software recently held an IT Security Workshop at the Westin Dragonara Resort, St Julians. The event was organised in collaboration with Oracle, the world's largest business software company and aimed to highlight the need for IT security.**

Addressing those present, Mr Michael Bürger, Oracle Product Director of Security for South East Europe pointed out that compliance is by far the largest driver behind organisations' investment in security (98%). Mr Bürger stated that the key drivers which lead to companies purchasing security products include: the risk of negative publicity, sabotage, espionage, external hackers, regulatory compliance, insider threats, auditing and data privacy, in addition to increasing regulations calling for strict internal controls to protect the privacy of employees and customer data.

Mr Godwin Schembri, RS2 Software Chief Technical Officer said: "RS2, an Oracle Certified Partner, is backed by years of experience in the provision of security in the field of financial services. It is offering the Maltese market Oracle's leading security solutions. RS2's technical resources are highly skilled and experienced in the use of the latest Oracle technology which offers refined, state-of the-art database security for government and commercial organisations. Oracle Database 11g's security features address critical requirements which surround data privacy and protection, regulatory compliance, and data consolidation."

Mr Godwin Schembri, Chief Technical Officer, RS2 Software plc

## Notes to Editors

### About RS2 Software p.l.c.

RS2's solutions are focused on the BANKWORKS suite of application modules. BANKWORKS is a powerful modular high-end card management system designed to meet current and future requirements in the international payment card industry. The system meets processing requirements defined by banks, service providers, as well as other organisations participating in diverse card businesses. The system's modules include Card Issuing, Merchant Acquiring, Transaction Processing, Clearing, Settlement, Reporting, Dispute Management and Internet Services.
