

RS2 USER FORUM MALTA 2010

Following the success of the last User Forum, RS2 Software is again inviting its customers to the **RS2 Software User Forum Malta 2010** which is being held at the Westin Dragonara Resort, Malta, on the **10th & 11th of March 2010**.

The concept behind the forum is that of providing customers with the latest news and functional updates on the RS2 end-to-end card management solution - BANKWORKS. It has also become customary that new BANKWORKS modules are announced and launched during the forum for the first time. This year will be no exception as two new modules will be announced, increasing the solution capabilities and addressing the needs of our customers. A number of selected third party vendors that provide complimentary services and solution to the BANKWORKS solutions will also be present. A list of confirmed third party vendors is provided below.

The agenda includes also presentation by well experienced speakers from Gartner, MasterCard and Oracle.

The forum will serve as an opportunity for our esteemed clients to share their experience with our diverse clients and to express views, specific needs and requirements. It will be an occasion to meet RS2 Software's business partners and to mingle with our team.

All customers have received a personalised invitation however anyone who is interested to attend should contact Ms. Claire Micallef by email (claire.micallef@rs2.com).
